EPA Survey:

Is this a residence, business, barn, or other structure?

Please indicate other structure _____

What year were the water lines connected to your water meter, if known. _____

What is the service line material past your water meter or at the point of entry (inlet) to your home? _____

Has the line from the water meter to your home/facility been replaced? Yes No

If yes, please provide the date and material used for replacement. _____

What material was used when running your lines: (Circle One)

Plastic/PVC/Pex/Other

Copper

Galvanized

Lead

The EPA is requiring all water utility companies to survey its customers to determine if the county water lines, that were ran before 1988 contain lead.

We are asking you to complete the top portion and return it to the office, even if your property was established after 1988. Your service line should start from your meter (usually 10 feet from the road) to the foundation of your home/structure. Please contact the Christian County Water District office if you need assistance with this request. (270) 886 3696

The table below will help you determine which pipe material your property possess:

PIPE MATERIAL	SCRATCH COLOR	DOES MAGNET STICK?
LEAD	SHINY SILVER	NO
COPPER	ORANGE (PENNY)	NO
GALVANIZED STEEL	DULL GRAY	YES
PLASTIC	N/A	NO

Optional – please email a photo of the water line entering your home from the meter to: ccwdleadproject@gmail.com, with your contact information.

Thank you for your time and consideration in providing information on this very important matter
You can submit this top portion by mail when paying bill, email, or at the office. If you have further questions or need help locating your lines please contact our office.

**** Failure to receive this information will result in us digging up your line ourselves****
